PRESS RELEASE

FOR IMMEDIATE RELEASE

MINNEHAHA COUNTY LAUNCHES BEACON™ ONLINE PORTAL

MINNEHAHA COUNTY, South Dakota. – (March 3, 2023) – Following a careful review process and a confident recommendation, Minnehaha County, South Dakota selected Schneider Geospatial's Beacon™ product as the foremost applicable option because of its user-friendly design, superior performance record, and overall functionality. Beacon™ is an interactive public access website that allows users to interact and view County information, public records, and Geographic Information Systems (GIS).

Minnehaha County's Beacon™ web portal features a public site that includes important property taxation and assessment information, in-depth search capabilities and property reports. Beacon™ also provides users the ability to view an interactive map of the County's GIS data and aerial photography, as well as convenient tools to collect specific parcel information.

Beacon™ is designed with its users in mind; therefore, new functionality is carefully implemented with client participation and evaluation. The continual progression of adding new functionality is designed to maintain a very simple and easily understood process when requesting data from the site.

Because all website set-up, development, hosting and maintenance tasks are handled by Schneider Geospatial, there is no need for Minnehaha County to purchase additional equipment. Beacon™ has been designed with a component-based architecture, which allows for rapid deployment. Schneider Geospatial hosts similar sites for over 600 organizations across the nation. For information on other states and sites, please visit <http://www.beacongis.com> or <http://beacon.schneiderGIS.com>.

About Schneider Geospatial

Since 1989, Schneider Geospatial has been providing creative geospatial and GovTech solutions that change the nature of how people interact with government, improving service while lowering costs. Schneider Geospatial is a leader in providing Geographic Information Systems (GIS) solutions to hundreds of municipal, county, state, federal, and private entities. Serving over 20% of the counties in the U.S., Schneider Geospatial is one of the largest GovTech providers with industry-leading solutions such as Beacon/qPublic.net (local government information for the web), GeoPermits (cloud-based permitting and workflow management), and Agland (which automates the process of calculating assessments for agricultural land). Schneider Geospatial is recognized nationally for its award-winning work. For more information about us, please visit <http://www.schneiderGIS.com>.
